### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 32 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the original disclosure for the limitations in claim 32 as set forth in paragraph no. 5, Paper No. 091506.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1761

5. Claims 10, 26 and 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Plank et al (2004/0180129) or Plank et al (7,105,195, cols. 4-7) as set forth in paragraph no. 9, Paper No. 091506.

6. Claims 8, 9, 14, 15, 22-25 and 27-29 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Plank et al (7,105,195, cols. 4-7). Plank et al discloses reducing acrylamide levels in grain or vegetable based food products as claimed by applicant in claim 14 by adding to the food products a composition including water and a cyclodextrin as claimed by applicant (claim 8) and then baking the food products.

7. Claims 8-10, 14, 15, 22-25, 27-29 and 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zyzak et al (2004/0101607, Abstract and page 4). Zyzak et al discloses reducing acrylamides in potato products by treating the potato products, before heating thereof, with cyclodextrins. It would have been obvious to use one of applicant's claimed cyclodextrins as the cyclodextrins in Zyzak et al since applicant's claimed cyclodextrins are the conventional forms thereof. With regard to claims 10, 26 and 30-32, applicant is referred to the reasoning set forth in paragraph no. 9, Paper No. 091506.

8. Applicant's arguments filed January 16, 2007 have been fully considered but they are not persuasive. There is no factual evidence of record to support applicant's contention that Plank et al and the claimed invention were assigned to the same entity at the time the claimed invention was made.
